

EVOTION objectives for second period

Niels H. Pontoppidan, Oticon

George Spanoudakis, CITY

Doris-Eva Bamiau, UCL

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 727521

Summary of key collective achievements

Cohort of 1220 patients identified
750 recruited as of August 2018
Ethics approval in UK+GR (+DK)

Needs monitoring,
Support, and backup

EVOTION Mobile App + EVOTION HAS in use with patients
Data flows validated

Access to EHS, AuditBase established with anonymization of clinical data
Unified protocol defined, Retrospective data collected

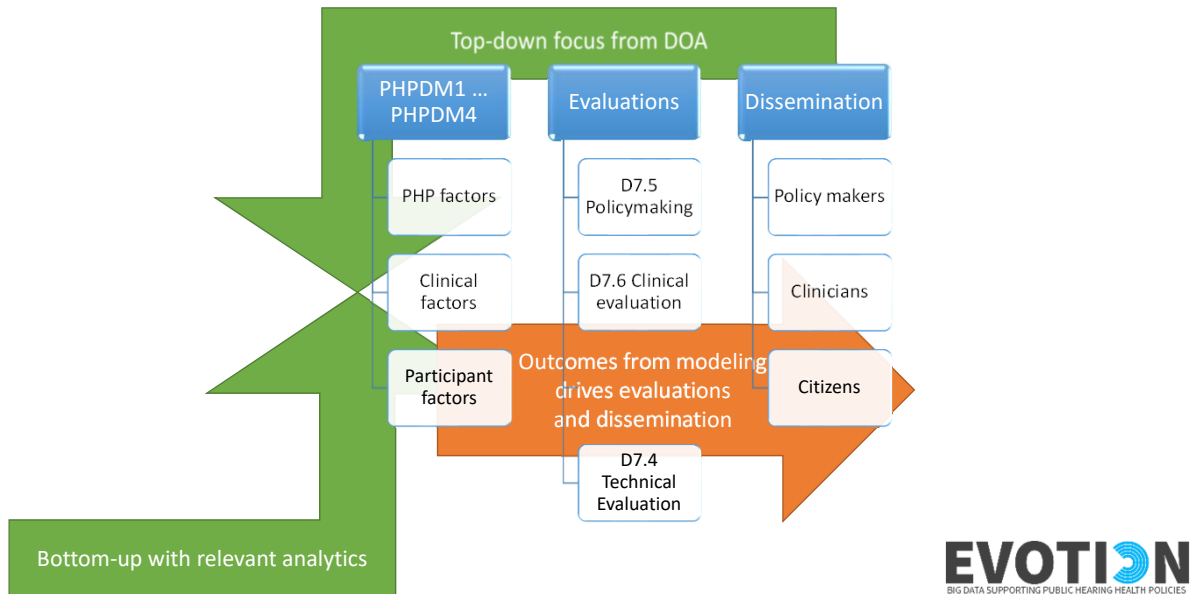

EU award (ATC)
CES award (OTC)

EVOTION Data Repository developed
BDA and DSS ready for integration

PHPDM Specification Language
PHPDM examples

Priority

Make the ends meet

D4.1 Figure 1

Task is to implement PHPDM1 ... PHPDM4 in this framework to connect policies and data
